

VS

MTM Heat Selling features over Val6

Fire 155 (competes with EPX)

- Larger BTU's 155,000 vs. 140,000 BTU's
- Patented air cooled cone design. No internal ceramic material that can break in handling. 210 watt internal fan
- Much, much, safer. Back of cone warm upon touch, the EPX will burn users. Metal cage not needed around heater.
- Protective floor shield, floor mat not needed
- Bigger fuel tank (17.2 gal); longer run time burning at 1.1 GPH
- Poly fuel tank vs. metal that can rust
- Bail lift point for job sites
- Hinged handle for easy transport
- Italian made
- Less expensive than EPX

Flame 115 (competes with KBE5L and KBE5S)

- 210 watt fan circulates as well as radiates
- Much safer, top can be touched by user during operation
- 0.85 GPH vs. 0.90 GPH fuel consumption
- Standard extendable floor shield
- Thermostat plug for easy thermostat attachment
- 1-2 ppm emissions
- Lightweight (92 lbs.)
- Much more compact for easy mobility
- Made in Italy
